<b>1</b>	<b>Installation</b>	<b>3</b>
<b>2</b>	<b>Usage example</b>	<b>5</b>

Based on open [Toggl API documentation](#)

## INSTALLATION

*pip install togggl-python* or use `poetry poetry add togggl-python`

## USAGE EXAMPLE

Get authenticated user time entries:

```
from toggl_python import TokenAuth, TimeEntries

if __name__ == "__main__":
    auth = TokenAuth('AUTH_TOKEN')
    print(TimeEntries(auth=auth).list())
```

Get information about authenticated user:

```
from toggl_python import TokenAuth, Users

if __name__ == "__main__":
    auth = TokenAuth('AUTH_TOKEN')
    print(Users(auth=auth).me())
```

Get information about authenticated user workspaces:

```
from toggl_python import TokenAuth, Workspaces

if __name__ == "__main__":
    auth = TokenAuth('AUTH_TOKEN')
    print(Workspaces(auth=auth).list())
```
